The Action Trackchair was developed in 2008. We have a fully developed distributorship having dealer representation for every state. The diversity allows the customer to have their own factory trained and certified personal representative to provide an onsite demo of the product as well as maintenance and warranty after the sale.

We offer sitting and sit to stand model chairs in both regular and narrow width. The narrow width will allow you to get through a doorway or into a wheelchair van. Armrests on all models flip up for easy transferring.

We also offer the only FDA cleared tracked wheelchairs.
